Bed care and maintenance

In order to maximise the life of your bed it is useful to develop a regular maintenance routine.

- Turn the mattress at least once a week in the first few months and once a month thereafter
- Don't roll or bend the mattress as this can permanently distort the shape
- Allow your bed to breathe by turning back the sheets and removing the bedding whenever you can
- Never use detergents or chemical cleaners on your mattress as many of these products can rot both stitching and fabric
- Don't leave newspapers, magazines or other printed materials lying on the bedding mattress surface. Their ink can bleed onto the fabric
